

Metal Complex Solvent Dyestuffs are soluble in organic solvents and exhibit good all-round fastness properties. They have particularly good solubility in alcohols, ketones, esters and ethers.

Metal Complex Solvent Dyestuffs are suitable for coloration of inks, wood stains, leather finish, stamping foil and paints based on solvents.

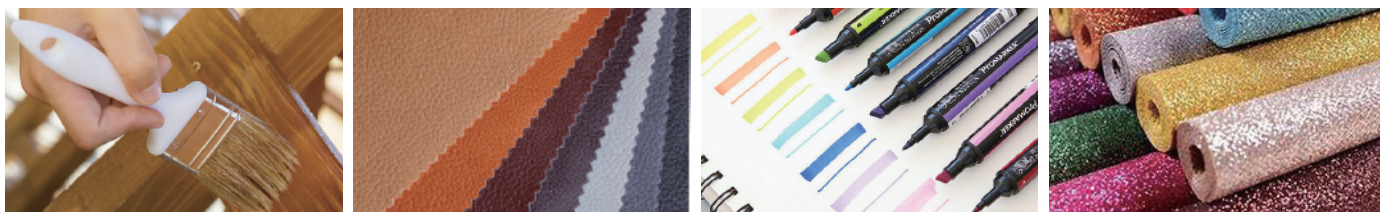

Metal Complex Solvent Dyestuffs are approved by the following regulations:

EN71-3, EN71-9

RoHS

Metal Complex Solvent Dyestuffs have been acquired REACH registered.

CODE	C. I. NO.	Cross Reference
